Chad

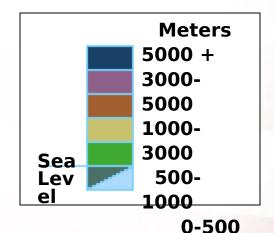

Topograph

Climate

Climate tropical in south, desert in north

Depressio
Terrain: broad, arid plains in center, desert in north, mountains in northwest, lowlands in south

Iowest point: Djourab Depression

160 m

highest point: Emikoussi 3,415 m

• Air :

- Low risk
- Localized air contamination may occur near specific industrial facilities or urban areas

Soil:

- Localized to specific areas surrounding industrial facilities and waste disposal sites
- Significant exposure to contaminants in soil is unlikely in the absence of wind-blown dust, active digging, or migration of contaminants from soil into ground water
- Usually presents a low risk to human health

• Food:

 Food may be contaminated with industrial particulates, chemicals from soil, pesticides, fertilizers, and fecal pathogens

• Water:

- Water contaminated with raw sewage
- Agricultural chemicals may contaminate surface and ground water
- Construction of Chad-Cameroon oil pipeline may contribute to water contamination

- Greatest short-term environmental health risks
 - Water contaminated with raw sewage
 - Runoff containing fecal pathogens

Chad: Diseases of **Operational Importance**

- Very High Risk country
- Diseases of greatest risk
 - Food and Waterborne Diseases: Bacterial diarrhea, Hepatitis A, Protozoal diarrhea, and Typhoid/paratyphoid fever
 - Vector-borne Diseases: Malaria
 - Sexually Transmitted Diseases: HIV/AIDS,
 Hepatitis B
 - Respiratory Diseases: Meningococcal meningitis
 - Water-contact Diseases: Schistosomiasis

Chad: Diseases of **Operational Importance**

Diseases of potential risk

- Food and waterborne Diseases: Brucellosis, Cholera, Hepatitis E
- Vector-borne Diseases: Crimean-Congo hemorrhagic fever, Rickettsioses (tickborne, spotted fever group), Chikungunya, Leishmaniasis, Rift Valley fever, Sindbis (Ockelbo) virus, Dengue fever, Yellow Fever, and West Nile fever, and Trypanosomiasis.
- Sexually Transmitted Diseases: Gonorrhea and Chlamydia.
- Water-contact Diseases: Leptospirosis
- Respiratory Diseases: Tuberculosis
- Animal-contact: Anthrax, Q-Fever, and Rabies
